Aftermarket Services

Training + Knowledge Transfer

Train + Empower.

Applications

- Operators
- Mechanical personnel
- Electrical personnel
- Maintenance teams
- New equipment
- Existing equipment

Build Capability Where It Matters Most.

Reliable equipment needs knowledgeable people behind it.

Our training helps operational, mechanical and electrical personnel develop the practical knowledge required to operate, maintain and troubleshoot drilling equipment safely and effectively.

Delivered on-site or in a classroom environment, training can be aligned with equipment, roles and customer requirements, helping transfer specialist knowledge to the people responsible for equipment performance every day.

Technology Only Delivers Value When People Know How to Use It

Drilling equipment and control systems continue to evolve, while experienced personnel and specialist knowledge are not always available where operations need them.

New equipment, workforce changes and increasingly sophisticated systems can create capability gaps across operations and maintenance teams.

Without the right knowledge, equipment may not be used to its full potential, maintenance can become reactive and customers can remain unnecessarily dependent on external specialists.
Effective knowledge transfer builds greater confidence and capability within the customer's own organization.

Training outcomes that matter

- ✓ **Greater operator confidence**
- ✓ **Improved equipment understanding**
- ✓ **Stronger maintenance capability**
- ✓ **More effective troubleshooting**
- ✓ **Safer equipment operation**
- ✓ **Knowledge retained within customer teams**
- ✓ **Improved use of equipment capability**
- ✓ **Reduced dependence on external intervention**

Our services

From equipment-specific instruction to broader operator, mechanical and electrical training

We help customer teams build the practical knowledge needed to operate, maintain and troubleshoot equipment safely and effectively. Delivered on-site or in the classroom, our training draws on BENTEC's OEM and technical expertise to strengthen capability and transfer knowledge into day-to-day operations.

Operator Training	We develop the knowledge required to operate equipment safely and effectively.
Mechanical Training	We build practical understanding of mechanical equipment, maintenance requirements and troubleshooting.
Electrical Training	We develop capability around electrical equipment, control systems and fault identification.
Equipment-Specific Training	We tailor learning around the equipment and systems installed within customer operations.
On-Site Training	We deliver practical knowledge within the customer's own operating environment.
Classroom Training	We provide structured technical learning led by experienced BENTEC specialists.
Knowledge Transfer	We support the transfer of specialist OEM and technical knowledge into customer operations and maintenance teams.

Why BENTEC?

- **Learn from the people who know the equipment**
  Training is backed by BENTEC's engineering, manufacturing and service expertise
- **Practical, not generic**
  Training can be focused on actual equipment, systems and operational requirements
- **Across disciplines**
  Capability spans operational, mechanical and electrical personnel
- **On-site + classroom delivery**
  Training can be delivered around customer requirements and operating environments
- **Knowledge that stays with you**
  Our aim is to strengthen customer capability and give teams greater confidence in supporting their own equipment
